

Batch F – Capstone Project Guidelines & Submission Process

Step 1: Join the Organization

Accept the GitHub Organization invitation and ensure you can access the training repository. Complete your GitHub profile.

Step 2: Create Your Personal Repository

Create a PUBLIC GitHub repository using the naming convention MUJ-DS-RegNo. Examples: MUJ-DS-229301001, MUJ-DS-229301025, MUJ-DS-229301180.

Step 3: Add Instructor as Collaborator

Add the instructor GitHub account as a collaborator and do not remove it during the training period.

Step 4: Repository Structure

Create: README.md, assignments/, notebooks/, code/, resources/, presentations/, and capstone/ folders.

Step 5: README Content

Include Name, Registration Number, Branch, Batch F, Project Title, GitHub Username, and Training Program details.

Step 6: Weekly Updates

Commit and push meaningful updates regularly. Maintain continuous GitHub activity.

Step 7: Capstone Repository

Create a team capstone repository and add all team members and the instructor as collaborators.

Step 8: Individual Contributions

Contributions may include coding, documentation, testing, deployment, data collection, frontend/backend development, and model development.

Step 9: GitHub Issues

Create and assign issues such as Dataset Collection, Model Development, Testing, Documentation, and Deployment.

Step 10: Pull Request Workflow

Use branches, create pull requests, conduct reviews, and merge approved changes.

Step 11: Deliverables

Repository must contain source code, documentation, presentation, screenshots, results, and installation guide.

Step 12: Final Submission

Submit Personal Repository URL, Capstone Repository URL, Presentation, and other required materials.

Evaluation Criteria (30 Marks)

1. Project Implementation & Functionality – 10 Marks
2. Individual Contribution (Commits, Issues, Pull Requests, Documentation) – 8 Marks
3. GitHub Repository Organization & Documentation – 4 Marks
4. Presentation & Demonstration – 4 Marks
5. Innovation & Problem Solving – 4 Marks

Total: 30 Marks

Important Rules

- Use GitHub throughout the project.
- Do not submit only ZIP files.
- Maintain regular commits.
- Keep repositories public unless instructed otherwise.
- Add the instructor as a collaborator to both personal and capstone repositories.
- Ensure all team members contribute meaningfully.
